No banging required with FlexFit® Technology

The flexible proximal end ensures confidence in a secure seal on the most popular and widest range of major brand pipettes. It also reduces pipetting forces required, improving ergonomics.

Built-in low retention with X-Resin® Technology

Our patented X-Resin technology helps ensure reproducible data by diminishing the presence of residual fluid in pipette tips.

Say goodbye to "Tip Touch Off" with Blade® Technology

Achieve accurate results while saving time. By minimizing the surface tension at the distal end of the tip, Blade technology eliminates hanging droplet formation.
